When You Send Parcels Overseas

Valuable Instructions as to Care in Packing and Addressing

Experience in sending parcels to the front proves the urgent necessity of exercising care in the address put on the parcels, and also in the wrapping of parcels, so that they reach safely to their destination. Careless or loosely wrapped parcels run a chance of never reaching the destination.

In connection with the address have the number, the rank and the name of the officer, N.C.O. or man belonging; address it to the army post office, London, England.

Many friends send tobacco to the boys at the front. Estate material should not be put in any parcel with tobacco unless both are mailed separately. Tobacco is a highly inflammable material and will in the least give off any moisture, and the tobacco is misused when it arrives and is useless; at the same time, your cakes, etc., will take the taste of the tobacco and is likewise useless.

Your parcel is therefore money and labor lost. It is in the correct way to send them: Wrap the tin box in a couple of layers of tissue paper, wrap the paper and the tin. Over this must be sewn a heavy square canvas bag with light and even stitches. This must be a good job, for the canvas; in other words the canvas bag or wrapper must be a complete cover in itself. To address this parcel is really one of the simplest jobs. Take the tin box, wrap it in the canvas, and then with an indelible pencil print the address on and who it is from. Let this dry and on the reverse side put on your customary declaration. Print the name of which can be obtained from any post office. Be sure you have enough postage on it.

Matrimonial Amelities

Useful in Camp—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains and aches. The Oil is a tonic or stimulant, or sprain be sustained, it cannot apply to be better as a dressing or lotion.

Danger in the Well

Of all the different wells to be feared the dug well is probably the most dangerous. It is usually well fitted with loose stones, leaving numerous cracks and crevices. In these openings many small animals such as frogs, lizards, snakes and mice make their homes. These animals, if recently fed, drop into the water and decay, thus making the water extremely unpleasant as well as unsafe for use. Aside from this point the dug well is open to another criticism. It is usually on a level with the surrounding area and during heavy rains is quite apt to receive the drainage and wash from surrounding barnyards and pens as well as from privies.

KEISER AND NICHOLAS United Against France

Secret Pact was Discovered by Count Witte During 1905

A long account of a secret pact between the Kaiser and Emperor Nicholas and aimed against France is given in the last issue of the Moscow Review. It is a story which, according to the story the existence of the treaty was discovered by Count Witte in 1905, while the peace negotiations between Russia and Japan were proceeding at Portsmouth. According to the story the existence of the treaty was discovered by Count Witte in 1905, while the peace negotiations between Russia and Japan were proceeding at Portsmouth.

Count Witte, facing at the deception of the Czar, informed the Kaiser that unless the pact was cancelled he would refuse to counter-sign the Kaiser's manifesto. Emperor, however, ever forgave Count Witte. At the beginning of the war Count Witte communicated the facts to B. Glinka, editor of The Messenger-Herald. He bound the editor to keep the information until he (Count Witte) was dead and circumstances warranted the revelation of "Nicholas' inconceivable levity or treason."

Government Maps

A new edition of the Southern Alberta Homestead map—a most useful publication, both from the standpoint of the settler and the business man—has just been issued by the Natural Resources Intelligence Branch of the Dept. of Interior, Ottawa.

While the primary object of this map may be said to have been to afford reliable information to the prospective settler as to land open for location, it is also designed to assist the general public which in many instances supply the "shovels of war" for the opening of a new country.

The colour scheme adopted in former editions of the map has been simplified in this tenth edition. The land has been divided into two main classes. The first of these represents that which has been already patented and the second shows that which, while entered for, has not yet been patented. In addition to these divisions the various colours indicate forest reserves, Dominion parks, timber lands, grazing reserves, Dominion Land Offices, and coal areas. The unenclosed and shown as surveyed are available for settlement. Another very important feature shown is the precise location of the railroads, these great arteries of trade, while other topographical features, such as the position of lakes and rivers, are also indicated.

Application to the Superintendent of the Natural Resources Intelligence Branch of the Dept. of Interior, Ottawa, will secure a copy free of charge.

(From the Kitchener Representative)

The accident which happened to the Kitchener man, who had just had his new car, and broke it for him, was as follows:

SEP.—In a park in Dublin two ladies of the proletariat were watching an elderly clergyman playing with some children. "Oh," said the first lady, "isn't he the grand old priest, an' he payin' that way with the young children?" "Priest," said the second lady, "Priest me eye: That's a Protestant Minister." "Well," said the first lady, "isn't he the dirty old fool?"

The crippled German airplane crashed to the ground behind the Prussian lines. The pilot staggered from the wreckage, blood spurting from 17 holes in his body and his eyes filled with horror.

"Ach, Gott! What have you learned?" cried the German nervously standing on one leg.

"Thunnel" gasped the airman. Dr. Lackner failed in his attempt to coerce the Alberta "electorate."

Mr.—Some time ago a Scotchman was showing an American visitor the sights, such as they are of Glasgow. Passing a statue he turned to his guest, and said, with reverent emphasis, "That's the statue of the great John Knox." "Who was he?" said the American. To which the shocked Scott replied, "Tide God, mon, d'ye no k' your Bible."

Maxwell

The Maxwell is Built for Canadian Roads

You may have an idea that perhaps the road conditions which your car must face are more trying than in other sections of the country.

But the fact is that the Maxwell is built especially for your roads—no matter how bad they may be. Before even a single car is passed out by our shops it must stand tests that are many times more stringent than any difficulties you will encounter in your vicinity.

Our tests for reliability and general serviceability are much more efficient than any road test could possibly be. We know—that word is used literally—actually know what the Maxwell is going to do before it leaves our shops.

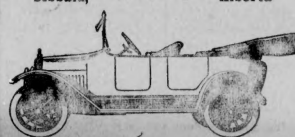

If you could see the large number of drop forgings, the splendid method of heat treating steel, and other features of construction that enter into the building of the Maxwell you would not have any fear regarding its sturdiness.

You may have hills. We know that the Maxwell will climb any hill you may have occasion to go over. You may have mud. The Maxwell is built to stand any possible strain it could be asked to stand in legitimate driving.

The Maxwell is built WITHOUT GUESSWORK—TO SUIT ALL ROADS—to suit your roads. In every part of the world it is giving perfect satisfaction.

Letter to the People
Of Oyen

Editor of the Oyen News.

Dear Sir:

I should esteem it a
favor if you would publish the
following letter which will con-
tradict certain statements
that have been circulated
around Oyen. Yours truly, J.
Howard Alexander.

Alberta Provincial Police,
Calgary, June 12, 1917

J. H. Alexander,
Mayor of the Village of Oyen.

Sir:
Adverting to your telephone
conversation last evening at 10
p.m. in reference to what you
claim that I had a statutory
declaration to the effect that
when I was at Oyen holding an
investigation into the conduct
of Const. Carroll, that I stated
that I was in receipt of letters
written by you making com-
plaint against Const. Carroll, I
beg to state for your informa-
tion, and for that of anyone else,
that whoever made this state-
ment, I most emphatically de-
ny. I have never received any
letter from any citizen of the
Village of Oyen during my re-
gime as Inspector, Command-
ing "C" Division, Calgary, not
only in connection with Carroll
but any other subject.

In connection with the in-
vestigation against Const. Car-
roll, these were instructions
which I received from my
superior officer in Edmonton.
Trusting this will be satis-
factory to you.

I have the honor to be, Sir,
Your obedient servant,
W. BLANKLEY,
Inspector, Commanding
"C" Division.

A letter received by Miss E.
Scott from her brother, Lieut.
E. Scott recently, states that he
accidentally met Pte. F. Horne
just after he had been wounded.
He says that Pte. Horne had
received several very bad
wounds of a serious nature,
and speaks in glowing terms of
the way he acted as a soldier.
In his letter Lieut. Scott gives a
graphic description of a trip he
had in an aeroplane across the
German lines, also a vivid ac-
count of the havoc played by
the war over in France.

Thousands of wives and daughters run their own Ford cars. They use them for shopping, calling, attending the theatre, taking the children for a run in the country or to school.

The Ford is as easy to operate as a kitchen range, no knowledge of mechanical details being necessary. Inexpensive to operate. A woman can call around town all afternoon, or take a 25-mile spin in the country, at the minimum of cost for gasoline, oil, wear on tires, etc.
